Allowable Subject Matter

1. Claims 1-34 are allowed.

Reasons for Allowance

- 2. The following is an examiner's statement of reasons for allowance: The reasons for allowance are based on the inclusion of:
 - a. In Claim 1, the radiation source comprises a plurality of parallel light emitting diodes having alternate anodes connected either to electrical ground or energized by a prescribed voltage and alternate cathodes connected either to electrical ground or energized by the prescribed voltage.
 - b. In Claim 4, the plurality of polarizers are substantially opague to radiation at the first wavelength and substantially transparent to radiation at the second wavelength.
 - c. In Claim 21, the method steps of determining the intensity of the radiation due to the contamination of the sensor only; and calculating the difference between the intensity of the radiation due to a combination of the torque acting upon the shaft and the contamination of the sensor and the intensity of the radiation due to the contamination of the sensor only to generate a compensated signal indicative only of the torque acting upon the shaft.
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
